

<b>Title</b>	<b>Describe concepts of quality and develop, implement, and report on quality objectives in a health or wellbeing setting</b>		
<b>Level</b>	<b>5</b>	<b>Credits</b>	<b>10</b>

<b>Purpose</b>	<p>People credited with this unit standard are able to, in a health or wellbeing setting:</p> <ul style="list-style-type: none"> <li>• describe quality, quality assurance, and a quality management system;</li> <li>• describe quality improvement, identify quality improvement opportunities, and develop quality improvement objectives;</li> <li>• develop and implement an action plan to achieve quality improvement objectives;</li> <li>• evaluate and report on the implementation of an action plan to achieve quality improvement objectives.</li> </ul>
----------------	---

<b>Classification</b>	Health, Disability, and Aged Support > Health and Disability Principles in Practice
-----------------------	---

<b>Available grade</b>	Achieved
------------------------	----------

## Guidance Information

- 1 Assessment conditions  
Evidence for the practical components of this unit standard must be generated in a health or wellbeing setting.

This unit standard cannot be assessed against in a simulated environment.

People awarded credit for this unit standard must work in accordance with own role and responsibilities, and organisational policies and procedures.

- 2 Range  
Evidence generated for assessment against this standard must reflect workplace requirements specified in:

- documented organisational policies, procedures, and methodologies;
- applicable health and safety plans, contract work programmes, and quality assurance programmes.

Evidence generated for assessment against this standard must reflect the values, processes, and protocols required to work with Māori, Pasifika, and people from diverse cultures.

Evidence generated for assessment against this standard must reflect the best practice guidelines and principles specified in:

- NZS 8134.0:2008 *Health and disability services (general) Standard*;

- NZS 8134.1:2008 *Health and disability services (core) Standards*;
  - NZS 8134.2:2008 *Health and disability services (restraint minimisation and safe practice) Standards*;
  - NZS 8134.3:2008 *Health and disability services (infection prevention and control) Standards*;
  - NZS 8158:2012 *Home and Community Support Sector Standard*.
- NZ standards can be retrieved from <http://www.standards.co.nz/>.

### 4 Definitions

*Health or wellbeing setting* includes but is not limited to the aged care, acute care, community support, disability, mental health, social services, whānau ora providers, and youth development sectors.

*Organisational policies and procedures* are the policies, procedures, and methodologies used in an organisation. They include legislative and regulatory requirements which may apply across an organisation, a specific site, or a workplace. Requirements are documented in organisational health and safety plans, contract work programmes, quality assurance programmes, policies, and procedural documents such as job descriptors and employment contracts.

*Quality* is the degree of excellence to which a health-related organisation aspires in achieving its own service delivery objectives and meeting the needs of the person and other stakeholders. The Ministry of Health identifies the five key dimensions of quality in the health and disability system as – people-centred, access and equity, safety, effectiveness, efficiency.

*Quality assurance* refers to all measures and actions taken to establish, protect, promote, and enhance the quality of health care for a person, including self-care and health care provided to a person by family and whānau.

*Quality improvement* is a philosophy of management that applies to quality management systems, service delivery, and client focus. It refers to systems, structures, and processes for continually enhancing the provision of health care services to people, in order to achieve high levels of consumer satisfaction, responsible use of resources, and optimum effectiveness and efficiency in day-to-day operations.

*Quality management system* refers to a formal management system that establishes policies and procedures for structuring and regulating an organisation's operations to promote the achievement of quality objectives. A quality management system will focus particularly on interactions with people in areas such as medication, restraint minimisation, infection control, promoting independence and interdependence, integrated care models, social models, clinical interventions, and clinical pathways as will best promote their comfort, health, and safety.

*Service delivery* refers to the manner and standard to which health care services are provided to a person and their family and whānau.

---

## Outcomes and performance criteria

### Outcome 1

Describe quality, quality assurance, and a quality management system in a health or wellbeing setting.

### Performance criteria

- 1.1 Quality is described against the five key dimensions of quality identified by the Ministry of Health.
- 1.2 Quality of service delivery is described in terms of Right 4 of the Code of Rights: *Right to Services of an Appropriate Standard*.
- 1.3 The purpose and application of quality assurance is described.  
  
Range health care services provided to people by the organisation, peoples' self-care, health care provided to people by families and whānau.
- 1.4 A quality management system is described in accordance with the references.
- 1.5 A quality management system is described for its purpose and application to stakeholder groups.

**Outcome 2**

Describe quality improvement, identify quality improvement opportunities, and develop quality improvement objectives in a health or wellbeing setting.

**Performance criteria**

2.1 The principles and practice of quality improvement are described in accordance with the references.

2.2 Quality improvement opportunities are identified in accordance with collected data.

Range collected data may include but is not limited to – service specifications, personal plans, incident or accident reporting, risk analysis, comments and complaints, health care audit feedback, workplace hazard identification, review of quality systems, management directives, policy changes (Ministry of Health, District Health Boards);  
evidence is required of a minimum of three different quality improvement opportunities;  
one must relate to the standard of health care services provided to people and their families and whānau;  
one must relate to operational processes.

2.3 Quality improvement objectives are developed in accordance with the organisational quality management system.

Range evidence is required of a minimum of three different quality improvement objectives;  
one must relate to the standard of health care services provided to people and their families and whānau;  
one must relate to operational processes.

**Outcome 3**

Develop and implement an action plan to achieve quality improvement objectives in a health or wellbeing setting.

Range evidence is required of one action plan relating to the standard of health care services provided to a person and their family and whānau, and one action plan relating to operational processes.

**Performance criteria**

3.1 An action plan is developed to help achieve quality improvement objectives.

3.2 An action plan is implemented to help achieve quality improvement objectives.

**Outcome 4**

Evaluate and report on the implementation of an action plan to achieve quality improvement objectives in a health or wellbeing setting.

**Performance criteria**

- 4.1 The evaluation measures actual outcomes against desired outcomes and recommends any amendments required to improve the action plan.
- 4.2 Outcomes are reported in accordance with organisational policies and procedures.
